

Your new job will put a smile on your face!

For our R&D team in Boeblingen, Germany, we are looking for an engineer (m/f):

Optics- / Mechanical Engineer (m/f) Develop the opto-/mechanics for our fiber optics product line

Your Profile

- ✓ You like to design optical measurement front-ends and mechanical systems.
- ✓ You have a university degree in opto-mechanics, mechanical engineering, or a comparable track record.
- ✓ You are engaged, creative, and self-reliant. You enjoy solving problems and delivering high quality results.
- ✓ You are a team player with excellent communication skills.

Our Offer

- ✓ Challenging, versatile and influential work based on an exciting high-tech product.
- ✓ A climate of openness, trust, respect and support.
- ✓ Nice colleagues and lots of fun in an international team.
- ✓ Competitive compensation and benefits, flexible working hours, development and career paths.

Are you ready to play a BIG role in a small team instead of a SMALL role in a big team?

Then it's time to put a smile on your face!

Please send your CV per email to hr@apsensing.com

Our Company

AP Sensing is a fast growing, global provider of fiber-optic based sensor technology serving customers in over 30 countries. Our solutions can be found at oil wells in Alaska, in the intelligent power grid in Shanghai, in the Euro-Tunnel and in many other places around the world. We combine a 25-year heritage in optical test with the spirit and enthusiasm of a successful start-up company. And our consistent growth is the result of our passion for excellence, close customer partnerships and empowered employees.
