

For our center of expertise in Basingstoke we are looking for a

Project Engineer

System Commissioning, Project Management & Support (m/f/d)

Your Responsibilities

As a hands-on engineer you manage fascinating customer projects on a global basis utilizing cutting edge fiber optic sensing technology.

You integrate our monitoring solutions, execute the field deployment and perform onsite commissioning. Preparing project related documentation, drawings and supporting our international customers is also part of your role. You are supported by a strong team, but also empowered to run end to end projects in a variety of exciting industries.

Your Profile

- You have a degree in electrical-, mechanical-, or optical-engineering, physics, computer science or a similar track record.
- Ideally more than 2 years of international experience.
- You are engaged, creative, and self-reliant, with a solution-oriented approach.
- You are an excellent communicator – a cooperative and dependable team player – with excellent written and spoken English skills and other languages are an advantage.
- You are flexible with regards to travel (ca. 35%).
- Solid MS Office experience is a must - experience in optical test and measurement, CAD tools are advantageous.
- Ideally you have a solid background in Windows Server, MS SQL, Modbus, other protocols.

AP Sensing

We are a fast growing, global provider of fiber-optic based sensor technology. Our solutions can be found in Offshore Wind parks, at oil wells in Alaska, in the Euro-Tunnel and in many other important infrastructures around the world. We combine a 30-year heritage from HP with the spirit and enthusiasm of a successful enterprise. Become an empowered employee and join our team of passionate, innovative people.

Our Offer

- Challenging, versatile and influential work based on state of the art technology.
- A climate of openness, trust and respect, based on the "HP Way".
- Nice colleagues and a pleasant work environment in a strong international team.
- Competitive compensation and benefits, flexible working hours, development and career paths, and a profit-sharing plan.

Are you ready to play a BIG role in a small team instead of a SMALL role in a big team?

Then you are spot-on with us...
