

For our headquarters in Boeblingen we are looking for a

Project Engineer

System Integration, Field Deployment & Support (m/f)

Your Responsibilities

As an hands-on engineer you will integrate solutions at our offices in Boeblingen, execute the field deployment and commissioning process of our monitoring solutions based on our sensing instruments and other off-the-shelf standard industrial components.

In addition you will prepare project related drawings and documentation and support our international customers.

You can play a key role in a motivated team in a position with a broad and interesting scope.

Your Profile

- You have an B.S. degree in electrical-, mechanical-, or optical-engineering, computer science, automation technology, or a similar track record.
- > 2 years of (international) experience.
- Good knowledge about fiber optics (FO cables, fiber types, splicing, fiber testing OTDR, laser).
- You are engaged, creative, and self-reliant, with a solution-oriented approach. Ideally you have collected your first job experiences that reflect this.
- You are an excellent communicator – a cooperative and dependable team player – with excellent written and spoken English skills and a fair command of German. Other languages are an advantage.
- You are flexible with regards to travel worldwide in order to provide the best possible support for our customers (travel time ca. 25%).
- Solid MS Office experience is a must - experience in optical test and measurement, CAD tools are advantageous.
- You have also a solid EDP background. (e.g. Windows Server, MS SQL, Modbus, IEC61850).

Our Company

AP Sensing is a fast growing, global provider of fiber-optic based sensor technology serving customers in over 30 countries. Our solutions can be found at oil wells in Alaska, in the smart power grid in Shanghai, in the Euro-Tunnel and in many other places around the world. We combine a 25-year heritage in optical test with the spirit and enthusiasm of a successful start-up company. And our consistent growth is the result of our passion for excellence, close customer partnerships and empowered employees.

Our Offer

- Challenging, versatile and influential work based on state of the art technology
- A climate of openness, trust, respect and support (based on the "HP Way").
- Nice colleagues and lots of fun in an international team.
- Competitive compensation and benefits, flexible working hours, development and career paths, and a profit-sharing plan.

Are you ready to play a BIG role in a small team instead of a SMALL role in a big team?

Then you are spot-on with us.

Please send your application, CV and your detailed engineering degree to hr@apsensing.com
